CONTENTS

Characteristics of geological hazards and it's mitigations of the <i>Ms</i> 6.8 earthquake in Luding County, Sichuan Province	TIE Yongbo, <i>et al.</i> (1)
Application of the bias aware Ensemble Kalman Filter with Confirming Option (Bias-CEnKF) in groundwater flow data assimilation	YANG Yun, <i>et al.</i> (13)
Controlling factors identification of groundwater system evolution based on numerical simulation in the typical arid-inland basin	YU Xiaolu, <i>et al.</i> (24)
Spatial and temporal distribution characteristics of soil moisture in the non-freezing period under the bare land and vegetation cover in the Mu Us desert	GAO Jia, <i>et al.</i> (34)
Numerical modeling of the impacts of reclaimed water recharge to the Chaobai River channel on the ambient shallow groundwater	JIANG Ruixue, <i>et al.</i> (43)
Research on evaluation and early warning of groundwater resources carrying capacity in Hebei Province	SUN Chao, <i>et al.</i> (55)
Anti-floating failure mechanism of underground structures in expansive soil area and application of active anti-floating measures	LUO Yibin, <i>et al.</i> (64)
Mechanical properties of saturated remolded loess under different stress paths	ZHAO Danqi, <i>et al.</i> (74)
Tensile strength characteristics and calculation methods of the cement stabilized soil	WEI Hongshan, <i>et al.</i> (81)
A study of mineral compositions and micro-structure characteristics for the Jinping marble	FENG Chenchen, <i>et al.</i> (90)
Triaxial test and strength analysis of root-soil composite	ZHONG Caiyin, <i>et al.</i> (97)
Types of water film on the surface of loess and related mineral particles and their quantitative characterization	LIU Jiating, <i>et al.</i> (105)
Probabilistic classification prediction of rockburst intensity in a deep buried high geo-stress rock tunnel during engineering investigation	LIU Weijun, <i>et al.</i> (114)
A study of the failure mode of landslide dam under the structural conditions of positive and reverse grain sequences	WU Maolin, <i>et al.</i> (124)
Research on early-warning prediction model of critical slide of creep landslide based on the <i>MACD</i> index	WANG Jiazhu, <i>et al.</i> (133)
Deformation mechanism and stability evaluation of Dingjiapo landslide considering the matric suction of unsaturated soil	SHI Aihong, <i>et al.</i> (141)
An analysis of non-penetration cracks in anti-dip rock slope based on centrifugal test	YANG Hao, <i>et al.</i> (152)
Rainfall infiltration process of multi-layer slope based on improved Green-Ampt model stability analysis	SONG Yixiang, <i>et al.</i> (162)
Studies on effect analysis of different exploration methods for karst collapse detection in the periods of rainy and dry seasons	JIN Aifang, <i>et al.</i> (171)
Geological storage conditions and potential assessment of CO ₂ in deep saline aquifers in Lindian of Heilongjiang Province	MA Yongfa, <i>et al.</i> (179)
A study of numerical simulations for enhanced geothermal reservoir parameters and thermal extraction based on microseismic data	MA Zihan, <i>et al.</i> (190)
An analysis of the deterioration mechanism of a grouting stone under the ion erosion	YI Fu, <i>et al.</i> (200)
